Mr. J. Low, Nat. Co-ordinator,
Comet and Nova Section,
411 Brixton Avenue,
St. Lambert, P. Q.

Dear Mr. Low:

As yet the Windsor branch of the R. A . S. C. does not have an active Comet or Nova program or representative. Untill such time as we have a representative I think it might be a good idea if you could keep me posted on any new developments or sightings of comets and novae visible in this areain that I may refer these to the others at our monthly meetings.

I would appreciate greatly your sending of any C. and N. program schedules, observing hints, current bulletins and most important, the locations of observable comets and novae.

Cordially yours,

Arthur Rae Jr.

Windsor Centre Planetary Representative.
