

Nov. 24/62

Dear Jim:

Your letter of Nov. 19<sup>th</sup> is B/A me. Many thanks. You sure would have benefitted more by our None Time - Keeper's talk more than I - altho I did enjoy the lecture ~~very~~ <sup>imm</sup> immensely (sorry!).

Am writing on my read board - and it "begs" me "in spots" - see what I mean.

Re the enclosed clipping - Dr Marshall loaned some equipment to Dr Thompson for his talk. Equipment that brot in signals - make-shift radio equip - but it illustrated perfectly what

-3-

might be an interesting project for our Centre. Brian Rawlings wasn't out but it was announced that w/ the facilities of an IBM computer, there might be a possibility of estimating such configurations as described by Nelson - and attempt to predict sunspot activity.

The skies have been improving & it is hoped that our C & M activity will increase w/ better weather.

I hope you would like to have a copy of my year's report to Mr. DeK.

Best regards -  
Bob Yance

be required.  
Your enlightening comments are appreciated.

I hope you might be interested in the enclosed clipping plus the subject of my "discourse" for 24th Nov - when I was on duty at the OBS. - We are having an OBS Committee Meeting on Dec 20th.

Could you please return my copy of the Nelson article. Hope you enjoy it.

The subject elicited a great deal of comment. It was decided that it
