

Dear Jim Low:

Here's something that'll
really complete your week!
Would you be good enough
to check and drop him a
line?

I hear he was in town yesterday
and had a chat with Dr. MacRae
who told him that he had no
knowledge of a comet at the
time mentioned (checked up in
the JOURNAL I believe) but he
would enjoy hearing from you.

Many thanks.

M. Fidler

Sirs:-

I write you concerning a comet I
observed in May or April 1920 or 1921 at Toronto
but which seems to have escaped official
notice.

I have since been looking for this comet
to return, as I understand they do periodically,
but to date have not succeeded in relocating it.

My few inquiries seem to indicate
that the usual scientific bodies have no
knowledge of this comet which was observed
approximately 1/2 hour after sunrise in the
Eastern sky which makes me wonder if it
would be of any scientific interest

If needed I am free to assist in any way
to pursue any investigation further

Sincerely
John W Wordley
