 July 12, 1964

Dear Mr. Maclean,

Thank-you for your letter and observations. The positions given on Announcement #8 are out by about 7 degrees. Here is a revised ephemeris:

| | | | |
|---------|---------|--------|------|
| July 14 | 09:45.4 | 22°54' | 6.5 |
| 22 | 09:56.6 | 20 13 | 7.7 |
| Aug. 1 | 10:02.5 | 18 03 | 9.1 |
| 11 | 10:05.9 | 16 30 | 10.1 |
| 21 | 10:08.6 | 15 15 | 11.0 |
| 31 | 10:10.9 | 14 12 | 11.7 |

There is another comet visible, but no ephemeris has been issued yet. It is a new Comet Ikeys, and was discovered on July 3. Here are some reported positions:

| | | | |
|----------|---------|----------|-------|
| July 3.8 | 04:15.0 | 16°50'N. | Mag 8 |
| 6.8 | 04:10.8 | 16 11 | 8 |
| 7.4 | 04:11.0 | 16 09 | |

Best regards, and good observing,

 Jim Low
