

88 Lorne Ave.
St. Catharines, Ont.
Thursday August 4, 1966.

Dear Mr. Low,-

Enclosed are negative search reports for June & July, the latter being a fine month for observing.

Nova Herulis 1963 has been seen a few times - it is near the zenith at convenient times at this time of year. It still requires a fairly clear night to put it within reach. It might be slightly fainter than a few months ago; but this is very difficult to decide when it is just about at the limit of my 8" f 8.

Best regards

Hugh W. A. Maclean
