Mr. Dennis Milon
Lunar and Planetary Lab.
University of Arizona
Tucson, Ariz. 85721

Dear Mr. Milon,

Thank-you for your ~~two~~ cards of August 11. Enclosed is a copy of my last Saturn drawing.

David Levy observed Comet Kilston again last night, and he made a better position estimate. Here is his data:

Aug. 15 02:37 U.T. 17h 55^m.5 19^o 20' N. Mag. 10.5
(1950)

I do not know if the U.S. airline strike slows down your mail. I have found that only some of my airmail correspondence from the U.S.A. is delayed. Your cards postmarked Aug. 11 and 12 reached me today.

Good observing!

Jim Low
