

Astronomy Videos

For a change in pace, a meeting could show one or several astronomy movies or science fiction movies.

The advisors or students' families might have a CD version of classics like ET or Star Wars. If someone has a subscription to something like NetFlix, they perhaps could show them. Many movies are on YouTube if schools allow them to be shown.

There are many different opinions on the best classic Sci Fi movies. This is one list:

<https://www.esquire.com/uk/culture/film/a32643057/best-sci-fi-movies/>

Also many videos get posted of astronomy news. NASA produces a short weekly summary which could be shown every meeting:
