

# Display case to promote astronomy club

Most schools have display cases. Perhaps a club could get permission make a display in one for a month or so. It's good experience for a club member to go to a vice principal to ask permission.

Perhaps interesting objects could be placed in a display case such as:

- a meteorite with a story about it
- a piece from a factory making space equipment
- eyepiece from telescope
- a star chart from an amateur astronomer
- Star Finder
